Cross lasers

Best friend on the construction site

Cross lasers Nivel System CL1 (red beam) and CL1G (green beam) are designed for determining the horizontal and vertical plane, and both at the same time in the form of a cross with arms intersecting at 90° angles. Equipment, thanks to a very distinct reference lines can be used for indoor and outdoor applications. Pulse function allows using the laser sensor and working with instrument at greater distances, also on the outside. CL1 set include laser adapter for easy fitting of construction elements relative to the reference laser beam.

	CL1	CL1G
Laser type	red	green
Accuracy	±1 mm / 5 m	
Angle of generated laser	90°±60°	
Operating range	15 m (inside), 50 m with a sensor	
Waterproof rating	IP54	
Tripod	1/4", 5/8"	
Power supply	4,5 V (3 x AA)	
Operating temp. range	-15° do +45°C	
Laser beam	vertical, horizontal, cross	
Dimensions	105 x 55 x 104 mm	
Weight	0,419 kg	

Nivel System cross laser CL1/1G is an instrument that replaces spirit level in most of the construction works. It allows one person to set on the wall horizontal and vertical reference lines, which are used for hanging furniture at the same height, spacing, electrical outlets and switches on the same level, setting the building plasterboard vertically and setting in a straight line points from floor to ceiling. Simultaneous displaying at the vertical and horizontal beams allows to determine the angle, which is useful in tiling works. Electronic blocking the instrument compensator allows the instrument to be tilted and diagonal lines to be used.
